Accessibility meets elegance

Normbau expands the Cavere Care product series to include an attractive and contemporary colour palette

The Cavere Care bathroom range is already well established on the market for accessible bathrooms featuring the very latest aesthetic designs. But with the addition of two new colours, which Normbau GmbH will be showcasing at ISH 2019, it is set to open up a whole new world of individuality for bathroom installations. The two new colours feature interesting contrasts and warm, earthy tones in line with the latest trends for interior design.

Sophisticated carbon black and natural sand shades

Today's interior design concepts are all about using a matt surface finish to create a feeling of exclusivity and sophistication. This is exactly why Cavere Care is now also available in carbon black. This matt black tone is full of character and lends a premium and distinctive look to any accessible bathroom. The second on-trend colour of satin beige is equally expressive. This has been added to meet the demand for warm, earthy tones and establish a feeling of sustainability within the space. Normbau selected these two new colours after conducting a series of trend analyses and market research. The combination of various shades within the Cavere Care system makes it possible to incorporate even more individual accents.

The new colours work in perfect harmony with the independent and elegant design language of this series, which is specially adapted to complement modern bathroom furnishings and meet the highest aesthetic standards. What's more, this combination of reliable functionality for accessible bathrooms and high-quality aesthetics is the perfect embodiment of the company's 'Passion for care' motto. And that applies right down to the last detail. The trigonometric contours of the rail profiles not only create an attractive design accent but are also highly functional. This is because the design makes them easier to grip for better support than more basic round tubes. This seamless overall bathroom design also features a comprehensive range of accessories. It includes lift-up support rails with optional electric push button, shower handrails and grab rails, folding seats, tilting mirrors, shelves and holders. Further bathroom accessories ranging from toothbrush holders to waste bins complement the range perfectly. The Normbau base plate is also available for this series to ensure flexible usage of accessible washrooms.

Normbau at ISH 2019: Hall 4.1, Stand H64
